

Bronze If the clinic does not have the ability to induce and maintain anaesthesia, there must be an arrangement with another local clinic to enable such procedures

Silver If the clinic has facilities to induce/maintain anaesthesia these must meet all of the following:

Equipment to administer oxygen, provide resuscitation and maintain body temperature

A range of appropriate endotracheal tubes

A suitable laryngoscope and topical laryngeal local anaesthetic

Equipment regularly serviced and maintained in good working order

Gold ALL of the above PLUS;

Anaesthetic charts filled out and retained to include:

Details of the patient and procedure

Induction and maintenance anaesthetic agents

Vital signs recorded at regular and frequent intervals

Any complications

Equipment routinely used for anaesthesia monitoring including:

Pulse oximetry

Blood pressure monitor

Oesophageal stethoscope

A trained member of staff undertaking anaesthesia monitoring including recovery
